

# EASY LAB

## TECHNICAL DATASHEET

# COLD-BLUIING AGENT BLACK

FOR FERROUS METALS – ZINC

**0806**

**BLACK**  
**IMMEDIATE EFFECT**

This product can tint by oxidation and patinates ferrous metals and zinc in Black.  
For copper, bronze and brass use our bluing-agent 0805-BLACK-BROWN-BROWN and antique green patina 0867.

This gives a darker black than the product 0805. Its different composition allows it to be less susceptible to rust the iron.

### APPLICATION

It should be applied on clean metal, unvarnished and dry metal, with a brush or dipped. Do not spray.  
This product may be diluted with water, which allows different shades, it is also available as concentrated Nr. 0866.

Rinsing with neutralizer 0804 prevents ferrous metals oxidized with the bluing agent from rusting before receiving protection.

### SECURITY :

- + Please read the security instructions carefully,
- + work in a well aired room,
- + wear rubber gloves,
- + keep out of reach of children.
